Gary King, Manager
Safety-Kleen Corporation
1500 Villa Street
Elgin, Illinois 60120Re: Safety-Kleen Corporation
ILD 000 805 911

Dear Mr. King:

An inspection of the above referenced facility was conducted on September 25, 1985, by Mr. James K. Wiggins, Environmental Protection Specialist, Illinois Environmental Protection Agency. A copy of the inspection report is enclosed.

The purpose of the inspection was to determine if your facility is in compliance with the Resource Conservation and Recovery Act permit conditions. We are pleased to report that your facility was found to be in compliance with this requirement.

If you have any questions, please contact Ms. Zetta Thomas of my staff at (312) 886-4555.

Sincerely yours,

William E. Muno, Chief
RCRA Enforcement Section

Enclosure

- Indicate any hazardous waste processes, by process code, which have been omitted from Part A of the facility's permit application.
- Indicate any hazardous waste processes (by process code and line number on EPA Form 3510-3 page 1 of 5) which appear to be eligible for exclusion per 35 Ill. Adm. Code 725.101(c). Provide a brief rationale for the possible exclusion.

I. STANDARD CONDITIONS

A. EFFECT OF PERMIT

The Permittee is allowed to store hazardous waste in accordance with the conditions of this permit. Any storage of hazardous waste not authorized in this permit is prohibited. Compliance with this permit constitutes compliance, for purposes of enforcement, with Subtitle C of RCRA. Issuance of this permit does not convey property rights of any sort or any exclusive privilege; nor does it authorize any injury to persons or property, any invasion of other private rights, or any infringement of State or local law or regulations. Compliance with the terms of this permit does not constitute a defense to any order issued or any action brought under Section 3013 or Section 7003 of RCRA, Section 106(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9606 (a), commonly known as CERCLA), or any other law providing for protection of public health or the environment.

B. PERMIT ACTIONS

This permit may be modified, revoked and reissued, or terminated for cause as specified in 40 CFR §270.41, §270.42, and §270.43. The filing of a request for a permit modification, revocation and reissuance, or termination or the notification of planned changes or anticipated noncompliance on the part of the Permittee does not stay the applicability or enforceability of any permit condition.

C. SEVERABILITY

The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances and the remainder of this permit shall not be affected thereby.

D. DUTIES AND REQUIREMENTS

1. Duty to Comply. The Permittee shall comply with all conditions of this permit, except to the extent and for the duration such noncompliance is authorized by an emergency permit. Any permit noncompliance, other than non-compliance authorized by an emergency permit, constitutes a violation of RCRA and is grounds for enforcement action, permit termination, revocation and reissuance, modification, denial of a permit renewal application, or other appropriate action.

2. Duty to Reapply. If the Permittee wishes to continue an activity allowed by this permit after the expiration date of this permit, the Permittee shall submit a complete application for a new permit at least 180 days before this permit expires.
3. Permit Expiration. The duration of this permit shall be three (3) years from the effective date of the permit, in conformance with the provisions or 40 CFR §270.50. This permit and all conditions herein will remain in effect beyond the permit's expiration date if the Permittee has submitted a timely, complete application 40 CFR §270.13 - §270.14) and through no fault of the Permittee the Regional Administrator has not issued a new permit as set forth in 40 CFR §270.51.
4. Need to Halt or Reduce Activity Not a Defense. It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
5. Duty to Mitigate. The Permittee shall take all reasonable steps to minimize or correct any adverse impact on the environment resulting from noncompliance with this permit.
6. Proper Operation and Maintenance. The Permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the Permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance includes effective performance, adequate funding, adequate operator staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facility or similar systems only when necessary to achieve compliance with the conditions of the permit.
7. Duty to Provide Information. The Permittee shall furnish to the Regional Administrator, within the time designated by the Regional Administrator, any relevant information which the Regional Administrator may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The Permittee shall also furnish to the Regional Administrator, upon request, copies of records required to be kept by this permit.
8. Inspection and Entry. The Permittee shall allow the Regional Administrator, or an authorized representative, upon the presentation of credentials and other documents as may be required by law to:
 - (a) Enter at reasonable times upon the Permittee's premises where a regulated activity is located or conducted, or where records must be kept under the conditions of this permit;

- (b) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
- (c) Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and
- (d) Sample or monitor, at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by RCRA, any substances or parameters at any location.

9. Monitoring and Records.

- (a) Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity. The method used to obtain a representative sample of the waste to be analyzed must be the appropriate method from Appendix I of 40 CFR Part 261. Laboratory methods must be those specified in Test Methods for Evaluating Solid Waste: Physical/Chemical Methods SW-846 as revised, Standard Methods of Wastewater Analysis fifteenth edition 1980 and 1981 supplement or current addition; or an equivalent method as specified in the attached Waste Analysis Plan
- (b) The Permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports and records required by this permit, and records of all data used to complete the application for this permit for a period of at least 3 years from the date of the sample, measurement, report or record. These periods may be extended by request of the Regional Administrator at any time and are automatically extended during the course of any unresolved enforcement action regarding this facility.
- (c) Records of monitoring information shall specify:
 - (i) The dates, exact place, method and times of sampling or measurements;
 - (ii) The individuals who performed the sampling or measurements;
 - (iii) The dates analyses were performed;

- (iv) The individuals who performed the analyses;
 - (v) The analytical techniques or methods used; and
 - (vi) The results of such analyses.
10. Reporting Planned Changes. The Permittee shall give notice to the Regional Administrator of any planned physical alterations or additions to the permitted facility, within 10 days of the decision to make the change.
11. Anticipated Noncompliance. The Permittee shall give advance notice to the Regional Administrator of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements. Such notification does not waive permittee's duty to comply with this permit pursuant to Paragraph D.1. of Module I.
12. Transfer of Permits. This permit may be transferred to a new owner or operator only if it is modified or revoked and reissued pursuant to 40 CFR §270.41(b)(2) or §270.42(d). Before transferring ownership or operation of the facility during its operating life, the Permittee shall notify the new owner or operator in writing of the requirements of 40 CFR Parts 264 and 270.
13. Compliance Schedules. Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than 14 days following each schedule date.
14. Twenty-four Hour Reporting. The Permittee shall report to the Regional Administrator any noncompliance with the permit which may endanger health or the environment. Any such information shall be reported orally within 24 hours from the time the Permittee becomes aware of the circumstances. This report shall include the following:
- (a) Information concerning the release of any hazardous waste which may endanger public drinking water supplies.
 - (b) Information concerning the release or discharge of any hazardous waste, or of a fire or explosion at the facility, which could threaten the environment or human health outside the facility. The description of the occurrence and its cause shall include:
 - (i) Name, address, and telephone number of the owner or operator;

- (ii) Name, address, and telephone number of the facility;
- (iii) Date, time, and type of incident;
- (iv) Name and quantity of materials involved;
- (v) The extent of injuries, if any;
- (vi) An assessment of actual or potential hazard to the environment and human health outside the facility, where this is applicable; and
- (vii) Estimated quantity and disposition of recovered material that resulted from the incident.

A written submission shall also be provided within 5 days of the time the Permittee becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause; the periods of noncompliance (including exact dates and times); steps taken to minimize impact on the environment; whether the noncompliance has been corrected; and if not, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent recurrence of the noncompliance. The Permittee need not comply with the five day written notice requirement if the Regional Administrator waives the requirement and the Permittee submits a written report within fifteen days of the time the Permittee becomes aware of the circumstances.

15. Other Noncompliance. The Permittee shall report all other instances of noncompliance not otherwise required to be reported above, at the time monitoring reports, as required by this permit are submitted. The reports shall contain the information listed in condition I.D.14.

16. Other Information. Whenever the Permittee becomes aware that he failed to submit any relevant facts in the permit application, or submitted incorrect information in a permit application or in any report to the Regional Administrator, the Permittee shall promptly submit such facts or information.

E. Signatory Requirement. All reports or other information requested by the Regional Administrator shall be signed and certified as required by 40 CFR §270.11.

F. Confidential Information. The Permittee may claim confidential any information required to be submitted by this permit in accordance with 40 CFR §270.12.

G. Documents To Be Maintained at Facility Site. The Permittee shall maintain at the facility, until closure is completed and certified by an independent registered professional engineer, the following documents and amendments, revisions and modifications to these documents:

- | | | | |
|---|----------|---|---|
| (1) Waste analysis plan as required by 40 CFR §264.13 and this permit. | <u>✓</u> | — | — |
| (2) Inspection schedules as required by 40 CFR §264.15(b) and this permit. | <u>✓</u> | — | — |
| (3) Personnel training documents and records as required by 40 CFR §264.16(d) and this permit. | <u>✓</u> | — | — |
| (4) Contingency plan as required by 40 CFR §264.53(a) and this permit. | <u>✓</u> | — | — |
| (5) Closure plan as required by 40 CFR §264.112(a) and cost estimate for facility closure as required by 40 CFR §264.142(d) and financial requirements and this permit. | <u>✓</u> | — | — |
| (6) Cost estimate for facility closure as required by 40 CFR §264.142(d) and this permit. | <u>✓</u> | — | — |
| (7) Operating record as required by 40 CFR §264.73 and this permit. | <u>✓</u> | — | — |

II. GENERAL FACILITY CONDITIONS

A. Design and Operation of Facility. The Permittee shall maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

B. Required Notice.

(1) The Permittee shall notify the Regional Administrator in writing at least four weeks in advance of the date the permittee expects to receive hazardous waste from a foreign source. Notice of subsequent shipments of the same waste from the same foreign source in the same calendar year is not required.

(2) When the Permittee is to receive hazardous waste from an off-site source (except where the Permittee is also the generator), he must inform the generator in writing that he has the appropriate permits for, and will accept, the waste the generator is shipping. The Permittee must keep a copy of this written notice as part of the operating record. (See Condition II.K.1).

NOTE REPT

C. General Waste Analysis. The Permittee shall follow the procedures described in the attached waste analysis plan, Attachment I.

D. Security. The Permittee shall comply with the security provisions of 40 CFR §264.14(b)(2) and (c).

E. General Inspection Requirements. The Permittee shall follow the inspection schedule, Attachment II. The Permittee shall remedy any deterioration or malfunction discovered by an inspection as required by 40 CFR §264.15(c). Records of inspections shall be kept as required by 40 CFR §264.15(d).

F. Personnel Training. The Permittee shall conduct personnel training as required by 40 CFR §264.16. This training program shall follow the attached outline, Attachment III. The Permittee shall maintain training documents and records as required by 40 CFR §264.16(d) and (e).

G. General Requirements for Ignitable, Reactive, or Incompatible Waste. The Permittee shall comply with the requirements of 40 CFR §264.17(a).

H. Preparedness and Prevention

- | | | | |
|---|---|---|---|
| 1. <u>Required Equipment.</u> At a minimum, the Permittee shall equip the facility with the equipment set forth in the contingency plan, Attachment IV, as required by 40 CFR §264.32. | ✓ | — | — |
| 2. <u>Testing and Maintenance of Equipment.</u> The Permittee shall test and maintain the equipment specified in the previous permit condition as necessary to assure its proper operation in time of emergency. | ✓ | — | — |
| 3. <u>Access to Communications or Alarm System.</u> The Permittee shall maintain access to the communications or alarm system as required by 40 CFR §264.34. | ✓ | — | — |
| 4. <u>Required Aisle Space.</u> At a minimum, the Permittee shall maintain aisle space as required by 40 CFR §264.35. | ✓ | — | — |
| 5. <u>Arrangements with Local Authorities.</u> The Permittee shall attempt to make arrangements with State and local authorities as required by 40 CFR §264.37. If State or local officials refuse to enter into preparedness and prevention arrangements with the Permittee, the Permittee must document this refusal in the operating record. | ✓ | — | — |

I. Contingency Plan.

- | | | | |
|---|--------------|---|---|
| 1. <u>Implementation of Plan.</u> The Permittee shall immediately carry out the provisions of the contingency plan, Attachment IV, and follow the emergency procedures described by 40 CFR §264.56 whenever there is a fire, explosion, or release of hazardous waste or hazardous waste constituents, which threatens or could threaten human health or the environment. | — | — | ✓ |
| | NOT REQUIRED | | |
| 2. <u>Copies of Plan.</u> The Permittee shall comply with the requirements of 40 CFR §264.53. | ✓ | — | — |
| 3. <u>Amendments to Plan.</u> The Permittee shall review and immediately amend, if necessary, the contingency plan, as required by 40 CFR §264.54. | — | — | ✓ |
| | NOT REQUIRED | | |
| 4. <u>Emergency Coordinator.</u> The Permittee shall comply with the requirements of 40 CFR §264.55, concerning the emergency coordinator. | ✓ | — | — |

✓ J. Manifest System. The Permittee shall comply with the manifest requirements of 40 CFR §264.71, §264.72, and §264.76.

YES NO N/A
✓ — —

K. Recordkeeping and Reporting.

✓ 1. Operating Record. The Permittee shall maintain a written operating record at the facility in accordance with 40 CFR §264.73(a), (b)(1), (2), (3), (4), (5), (6), (7), and (8).

✓ — —

✓ 2. Biennial Report. The Permittee shall comply with the biennial report requirements of 40 CFR §264.75.

✓ — —

L. Closure.

1. Performance Standard. The Permittee shall close the facility as required by 40 CFR §264.111 and in accordance with the closure plan, Attachment V.

— — ✓
CLOSURE HAS NOT
BEGUN

2. Amendment to Closure Plan. The Permittee shall amend the closure plan in accordance with 40 CFR §264.112(b) whenever necessary.

— — ✓

3. Notification of Closure. The Permittee shall notify the Regional Administrator at least 180 days prior to the date he expects to begin closure.

— — ✓
CLOSURE HAS
NOT BEGUN

4. Time Allowed For Closure. After receiving the final volume of hazardous waste, the Permittee shall treat or remove from the site all hazardous waste in accordance with the schedule specified in the closure plan, Attachment V. After receiving the final volume of hazardous waste, the Permittee shall complete closure activities in accordance with the schedule specified in the closure plan, Attachment V.

— — ✓

5. Disposal and/or Decontamination of Equipment. The Permittee shall decontaminate and/or dispose of all facility equipment as required by 40 CFR §264.114 and the closure plan, Attachment V.

— — ✓

6. Certification of Closure. The Permittee shall certify that the facility has been closed in accordance with the specifications in the closure plan as required by 40 CFR §264.115.

— — ✓

M. Cost Estimate for Facility Closure. The Permittee's original closure cost estimate, prepared in accordance with 40 CFR §264.142(a), is specified in Attachment VI.

1. The Permittee must adjust the closure cost estimate for inflation within 30 days after each anniversary of the date on which the first closure cost estimate was prepared, as required by 40 CFR §264.142(b).

— — ✓

YES NO
 — —
 NOT REQUIRED

2. The Permittee must revise the closure cost estimate whenever there is a change in the facility's closure plan, as required by 40 CFR 6264.142(c).

3. The Permittee must keep at the facility the latest closure cost estimate as required by 40 CFR 6264.142(d).

✓ — —

N. Financial Assurance for Facility Closure. The Permittee shall demonstrate continuous compliance with 40 CFR 6264.143 by providing documentation of financial assurance in at least the amount of the cost estimates required by permit condition II.M. Changes in financial assurance mechanisms must be approved by the Regional Administrator pursuant to 40 CFR 6264.143.

— — ✓

O. Liability Requirements. The Permittee shall demonstrate continuous compliance with the requirements of 40 CFR 6264.147 including the requirements to have and maintain liability coverage for sudden and accidental occurrences in the amount of at least \$1 million per occurrence with an annual aggregate of at least \$2 million, exclusive of legal defense costs.

— — ✓

P. Incapacity of Owners or Operators, Guarantors, or Financial Institutions.

— — ✓

The Permittee shall comply with 40 CFR 6264.148 whenever necessary.

O. Financial Assurance and Liability Documentation Requirements. The financial assurance and liability insurance document must be modified as described below.

1. Since the State of Illinois is authorized to administer the RCRA financial assurance requirements, all documentation should be made out to the Director of Illinois Environmental Protection Agency (IEPA). Paragraph 1 of the financial instrument should list all Illinois facilities, and the wording in paragraph 3 should read IEPA instead of EPA and list of all other facilities outside of State of Illinois.

— — ✓

2. All documentation must be original, with original signatures. Copies should be submitted U.S. EPA, Region V offices.

— — ✓

3. The existence liability insurance covering sudden occurrence must be demonstrated.

— — ✓

IV. STORAGE IN TANKS

Identification. The Permittee may store the following hazardous wastes in tanks, subject to the terms of this permit:

YES NO
✓ —

pent halogenated solvents used in degreasing

pent halogenated solvents

air al sprits

immersion cleaner

Still bottoms and sludges from the recovery of the solvents in 1-4 above.

following above ground tanks are permitted for storage of the following wastes: 7, 11, 113, 72, 73, 8, 30, 121, 136, 137, 138, 80, 32.

✓ —

following underground tanks are permitted for storage of the following wastes: 26, 27, 36, 37, 108, 112, 133, 140, 141, 142, 139, 148.

✓ —

Of the above tanks is further subject to the conditions specified in Attachment VIII.

more than 142,000 gallons of hazardous waste can be stored in the permitted tank storage area at any time.

✓ —

Design of Tanks. The Permittee shall construct maintain tanks as required by 40 CFR §264.191. The minimum allowable thickness for above ground tanks are as follows:

— — ✓

Carbon Steel

Stainless Steel

(in.)

(in.)

11 0.167

0.115

tom 0.240

0.158

0.123

0.086

minimum allowable shell thickness, excluding coating or lining, underground tanks shall be 0.25 inch.

Requirements for Ignitable or Reactive Wastes.

Permittee shall not place ignitable or reactive waste in a tank unless the procedures described in Attachment VIII are followed, as required by 40 CFR 264.198(a).

YES NO NA

☒ ☐ ☐

Permittee shall document compliance with IV. D.1 required by 40 CFR 264.17(c) and place this documentation in the operating record (condition II. K.1).

☒ ☐ ☐

Permittee shall maintain buffer zones around covered tanks specified in Attachment VIII, as required by 40 CFR 264.198(b).

☒ ☐ ☐

Requirements for Incompatible Wastes.

Permittee shall not place incompatible wastes in the same tank or place hazardous waste in a tank previously held an incompatible waste or material.

☐ ☐ ☒
NOT INCOMPATIBLE

al Conditions for Drum Storage

The volume of liquid in Tank No. 148 shall be checked at least once ☒ — —
each operating day. To insure compliance with 40 CFR 264.175(b)(3),
this tank must always have sufficient additional capacity to contain
a volume equal to 10% of the total volume of material stored in
containers in the drum storage building.

All drums in both drum storage areas must be labeled so it is ☒ — —
obvious which drums are subject to the regulations in Sections 122
and 264, and to the conditions of this permit.

Adequate isle space must be maintained in loading dock and trunk ☒ — —
near drum storage site to allow unobstructed movement of personnel,
fire protection equipment, spill control equipment and decontamination
equipment. The drum arrangement indicated on Figure IV-4, which
was submitted as part of the application would not allow access to
all portions of the facility in the event of an emergency.

To insure compliance with 40 CFR 264.175(b)(2), containers located ☒ — —
at the base of the unloading ramp must be elevated to prevent
contact with any accumulated liquids. It is recognized that
precipitation and spills from the entire ramp area will accumulate
there.

WS:tk/26

SPECIAL CONDITIONS FOR STORAGE IN TANKS

YES NO NA

The level of waste in each tank shall be measured each operating year. Before any waste is transferred into a storage tank, the permittee shall make certain there is adequate capacity remaining in the tank to minimize the potential for overfilling. The secondary containment dikes around the tanks must be maintained to contain any liquids in the event overfilling occurs.

✓

Tanks containing flammable or combustible wastes shall be maintained and operated in accordance with the Codes and Standards of the National Fire Protection Association (Number 30).

✓

The Permittee shall develop and follow an inspection program adequate to detect leaks, cracks, corrosion or erosion which may lead to cracks or leaks, or wall thinning to less than the thickness required in condition IV-2. These procedures shall include emptying the tank to allow entry and inspection of the interior sides and bottom for evidence of corrosion and erosion.

✓

The Permittee shall continue to plan and eventually implement a groundwater restoration program in accordance with any agreements made with the State of Illinois.

✓

TO: Division File DATE: 9-25-85FROM: Garnie R. Higgins ☐ Information onlySUBJECT: Cook County - 0314380001 - Elgin / Safety-Kleen ☐ Response requested

A RCRA part B inspection was conducted at Safety-Kleen solvent reclamation facility, at 1500 Villa St. in Elgin, on the above date.

Safety-Kleen conducts a solvent recycling operation consisting of gravity separation and vacuum distillation. Safety-Kleen now operates under a RCRA permit issued on March 14th, 1984. The facility's part B permit is for tank and container storage, prior to distillation, of the following materials: (1) various halogenated solvents (2) mineral spirits (3) immersion cleaners (4) still bottoms and sludges from the recovery of these solvents. Container storage is conducted in two separate storage locations, with a total maximum permitted capacity of 600 - 55 gallon containers. Tank storage consists of both above ground and below ground tanks with a maximum quantity of 142,000 gallons allowed under the permit.

The standard conditions and special conditions of Safety-Kleen's RCRA permit were reviewed/discussed prior to an inspection of the facility's operations. A condition of inadequate wall space observed during a previous inspection has since been corrected. No other deficiencies were observed at the time of the inspection.
